Build a better risk-control strategy with Liberty Mutual Insurance. Our consulting center can answer your questions, provide advanced technical guidance, and help you prevent and control losses with a flexible array of solutions.

We start by assessing your safety-related problem to identify root causes, exploring the frequency, likelihood, and potential severity of risk. We provide practical tools and recommendations that you can implement quickly. Through telephone consultation or by analyzing photos or videos of specific problem areas, our teams develop a comprehensive grasp of the issues. Then they conduct further research, design custom training solutions, or help put a formal safety program in place. We can also work with you to identify methods to monitor installed solutions and validate their effectiveness.

"The center is a dependable and reliable service for us. We have always received excellent customer service and expeditious responses from your consultants."

— Liberty Mutual Insurance policyholder

Experienced

You will work with a team of qualified professionals. Our risk control consultants have degrees in safety, risk control, engineering, business management, and related fields. Many also have industry-specific experience. They work with you either over the phone or by email to identify risks in your operation and put innovative — yet practical — safety solutions in place.

Responsive

Because our consultants have access to Liberty Mutual's unrivalled safety research and resources, they can answer just about any question that comes up. They can also reach out to technical professionals with greater in-depth knowledge about your specific industry and its unique safety challenges.
